

Elastic Bandages

The HCS Elastic Bandage line offers three different grades of stretchable, breathable, latex free bandages used to create localized compression. These bandages are ideal for securing splints, dressings, ice packs and for use in the treatment of varicosities. They can also be used during recovery of an injury and to treat muscle strains and sprains by applying stable pressure or compression to a particular area.

The elastic bandages come individually wrapped, in a variety of popular sizes and packaged in a convenient dispenser box.

See back for ordering information

HCS Economy Bandage

This polyester/cotton knit blend bandage is used for low compression and features two metal clips.

HCS Standard Bandage

Made of a polyester/cotton knit blend, this bandage is used for high compression and features easy-to-use velcro on one end of the bandage. Colored starting stitch helps to easily identify the start of the roll.

HCS Premium Bandage

Our highest quality bandage is used for high compression and made of a polyester/cotton weave. Features velcro on both ends of the bandage and comes with a colored starting stitch to easily identify the start of the roll.
