

## Fall Risk Kit

Patient safety and wellness is always the most important focus for any caregiver during a patient's stay. HCS Fall Risk Kits are pre-assembled, color-coded kits that contain key components to easily identify fall risk patients and help prevent fall injuries. These Fall Risk Kits are ideal for helping patients or residents with altered cognition or a mobility impairment during their stay.

Included in the kits are the popular HCS All-Around Tread Slipper, featuring constant tread to floor coverage, an ID band, magnet, and sticker, providing multiple ways to identify a fall risk patient discretely.

### Fall Risk Kits
