

Fall Risk Products

Patient safety and wellness is always the most important focus for any caregiver during a patient's stay. HCS offers color-coded fall risk products that can help easily identify fall risk patients and help prevent injuries.

In addition to the individual items, HCS boasts these products in kits as well and has the ability to create customized kits based on your needs. These Fall Risk Kits are ideal for helping patients or residents with altered cognition or a mobility impairment during their stay.
