

Ice Bags

Used as a comfortable and reliable pain relief option, the HCS Ice Bags offer a convenient and effective method for specialized cold therapy.

Our ice bags are available in two sizes and are constructed with four ties that help secure the bag and establish proper bag placement directly where therapy is needed. The 3-layer construction includes a soft outer covering that helps soothe injured tissue, while keeping moisture in the bag and the affected area dry.

Designed with an easy-to-use, anti-leak clamp closure that allows for quick and easy refill.
